Company Introduction

Hanshin Neji Co.,Ltd. is founded on 1947 in Osaka, Japan. At very first period of establishment, we aim for manufacturing fasteners and distribute them throughout Japan. Then on 1965, we changed our business into full-range of fasteners distributor.

We distributing variety and good quality fasteners throughout Japan and overseas customers with our strengths “Fast deliver and No minimum order quantity” would benefit to various application for customer, with our strong business relation with numbers of suppliers, make us be able to holding a stock of 700,000 SKU which covering almost of any fastener’s application. Our mission is to make customer to work smoother and easier without any fastener procurement and quality concern.

This is our 75th years of establishment, we have been gained a lot of trust from our customer worldwide in Asia, Europe, and North America. We would like to apply our expertise and experience that we have gained to contribute to manufacturing section and we are also striving to build a trust and satisfaction through our products and services to customer all over the world.

Japanese Quality

Japanese are widely acknowledged and renowned for quality, we put all everything to the work. This mean every single piece of fastener we sell are combine these factors below.

01

Material : We use only best quality steel and every single part from us we can provide “Mill sheet” that you can track back what are those made from

02

Technic : Japanese gained a century-long experience for making fasteners, so these knowledge and skill are pass through our fasteners

03

System : Each manufacturer have their own rules for keeping quality and standard. For example our supplier doesn't use “DIES” until it broken, they will proactively change it before it's time. So this make Manufacturer have strictly good dimension parts, and have very few NG parts

Spirit : Japanese aim for the best for everything, for manufacturing process it's mean “High quality”. Even though this is not a must but we strive and eager to find the way to make everything better. This called “KAIZEN”, refer to continue improving the process and also eliminate unnecessary process at the same time. Prevent and fix the problem before they have a possibility to be occurred.

Electronic Parts

We can supply any of Japanese industrial product such as electronics parts, industrial oil, pneumatics part, machine parts, fitting, dangerous goods and etc.

We also do have Dangerous goods export license, if you have any inquiry of any Japanese industrial product, please let us know.

Other Services

Packing Service

We can pack and separate the product in to your desired packaging size. Customized label and box also available

Assemble Service

We can assemble Bolt, Washer and Nut together as a set Which suited for application where operating at height place

NYLOK®

Nylok® is made from high quality nylon patch which are applied on the thread of fasteners to prevent loosening from vibration and with its reusable function, made **Nylok®** popular in worldwide industrial usage Ex. Satellite, Aircraft, Train, Military equipment, Car, Food machinery, Medical equipment, Ship, and etc.

- 01 "We can apply **Nylok®** from the smallest size fasteners as M1.7 on several kinds of fasteners."
- 02 "Large stock of applied **Nylok®** are available for standard size fasteners!"
- 03 "Custom made according to application!"
